

MOHAMMADALI JAVADINASAB

AI Researcher & Electrical Engineer | Tehran, Iran | ma.javadinasab@gmail.com | [linkedin.com/in/35majn](https://www.linkedin.com/in/35majn)

EDUCATION

M.Sc. in Electrical Engineering (Signal Processing) - Shahid Beheshti University (2025 - Present) | GPA: 3.33/4.0

B.Sc. in Electrical Engineering (Telecommunications) - Iran University of Science & Technology (2019 - 2024) | GPA: 3.41/4.0

B.Sc. in Industrial Engineering (Minor) - Iran University of Science & Technology (2020 - 2024) | GPA: 3.32/4.0

RESEARCH & PUBLICATIONS

EEG Source Localization Using Deep Learning (Deep Volumetric Source Imaging - DVSI)

Target: IEEE TBME (Manuscript in Progress) | First Author with Dr. Ehsan Darestani (KU Leuven)

PROFESSIONAL EXPERIENCE

Research & Teaching Assistant - Iran University of Science & Technology (2022 - Present)

- 3D Deep Convolutional neural architectures for EEG cortical dipole retrieval

- Linear Algebra Teaching Assistant for Dr. Saeed Ebadollahi

AI & Data Science Specialist - Freelancer (2022 - Present)

- Colon Polyp Detection Hackathon (IUST & Irancell Labs 2025): 95% detection accuracy with clinical chatbot

- Federated Learning with RL for imaging satellite topology optimization (Australia collaboration)

- Transfer Learning for Skin Cancer Classification (95% accuracy) and MADM algorithms in Python

Co-founder & Lead Web Developer - LearnAmuse (2022 - Present)

- Built and launched LearnAmuse.com; created AI integration training courses for educators

R&D Engineer & Instructor - Balafan AI Academy (2021 - 2023)

- Video analytics on NVIDIA Jetson Nano with DeepStream SDK; taught Deep Learning to 35+ students

Python Developer & Data Scientist - LifeWeb (2021 - 2022)

- Backend development with Flask, Elasticsearch, MongoDB; RNN market sentiment analysis

HONORS & AWARDS

- Top 1% in Nationwide University Entrance Exam among 150,000+ candidates (2019)

- Head of Team of 7: IEEE SPS 2022 Signal Processing Cup (Synthetic speech attribution)

- 1st Place: Huawei Seeds for the Future (5G, AI & Cloud) (2022)

TECHNICAL SKILLS

Languages: Python, MATLAB, C++, JavaScript/TypeScript, LaTeX

ML & AI: PyTorch, TensorFlow, Keras, scikit-learn, Reinforcement Learning, Federated Learning

Signal & BCI: EEG Signal Processing, Source Localization, Brainstorm, FieldTrip, Bio-Electromagnetics

Embedded & Tools: NVIDIA Jetson Nano, CUDA, DeepStream, Docker, Git, Linux, Flask, Elasticsearch
